Re: Hazardous Waste Compliance Inspection
EPA Identification Number KSD007246846

Dear Mr. Robertson:

I have reviewed your written responses dated June 3 & July 7, 1999 which address the remaining violation from my November 3-4, 1998 inspection of your facility. According to the information provided you have "resurfaced with an impermeable coating on June 30, 1999" the processing area floor.

Based on this information you have satisfactorily addressed the requirements of Permit Condition III F which specifies secondary containment requirements. Your facility is now considered to be in compliance to hazardous waste regulations relevant to the findings of my inspection.

Thank you for your cooperation with the hazardous waste management program of Kansas. If you have any further questions regarding the inspection or this letter, you may contact me via telephone, fax or e-mail listed below.

Respectfully,

Gilbert L. Perez, CHMM
